Go further...

Because your needs are unique,
our tanks are customised.

In addition to standard designs, ACGB provide ingenuity and technical excellence for your projects, meeting and exceeding your requirements to serve you and your innovations: Commercial vehicles and the transport of people and goods on land and sea.

Design & Engineering

Bespoke reservoirs, innovative and intelligent.

To provide to your specification, we listen and comprehend the exact requirements to realise a customised solution to fulfil technical and economic needs. Our database of over 9000 configurations is the basis for **our project team to invent, design and adapt your next reservoir.**

ACGB expertise provides solutions for all type of reservoirs. Simple, complex, hydraulic, fuel or mixed and any combination. In terms of specifications, regulations and standards, you are assured that ACGB expertise will deliver the product for your needs. It is no coincidence our design rules are recognised by the market leaders.

Perfectly integrated into the space you create, **your ACGB reservoir delivers in terms of optimisation of capacity,** longevity and weight saving even in the most extreme operating conditions.

Our Study Methods:

- 3D CAD
- Simulations
- Finite element analysis
- Testing and technical validation
- Prototyping, pre-production, initial samples
- Validation and certification through official organisations.

Industry Sectors

- ▶ Trucks and Vans
- ▶ Industrial and Automotive Body
- ▶ Cranes, Construction and Earth Moving Equipment
- ▶ Refrigerated Vehicles and Cooling Applications
- ▶ Coach and bus
- ▶ Marine
- ▶ Aerospace
- ▶ Defence
- ▶ Energy

...

**Innovation,
performance,
responsiveness
& rigour**

*For over 40 years, ACGB has been involved in the success of projects for our customer base. With ACGB, you receive **an SME's flexibility and attention to detail coupled with the methods and compliance standards specific to each major industrial sector.***

Production

Made in France in our facility.

The means and resources are in place to organise and produce **small to medium series products to the same requirements as serial production.** Our procedures ensure full traceability and repeatability of every tank, delivered just in time

- E.D.I.
- Certifications ISO 9001/ 14001 / TS 16949

Think tank

Internal Components innovated from our experience
(Technical partitions, fuel traps, complex and serpentine tubes, anti-siphon and anti-spill devices)

Material
Aluminium
Stainless steel

All types of fluids:
fuel, lubricants,
water, chemicals
or organic

System Integration
Peripheral equipment,
mounting and fixing,
accessories...

Shapes, sizes and technical specifications on request

**International
reputation**
relayed locally
